The 2017 Greater Manchester Strategy (GMS) sets out a commitment to develop an Implementation Plan to detail the specific actions and activities underway to deliver GM’s strategic vision and ambitions. In April 2018, the GMCA agreed a two year Implementation Plan with the inclusion of ambitions to be achieved by 2020, and delivery milestones for the first six months (to October 2018).

The GMS Performance Dashboard has been developed to sit alongside the Implementation Plan, to provide a better understanding of performance in the round. The performance dashboard metrics will help us to unpack change demonstrated by the headline indicators, as they capture performance in specific areas that contribute to the key outcomes we are seeking to track.

This performance report provides an update of progress against the agreed delivery milestones under each GMS priority after the first six months delivery, and an assessment of GM’s current likelihood to achieve the actions agreed to be delivered by 2020. The performance report combines the delivery update information with the performance dashboard update, to produce a single document demonstrating current progress, highlight any challenges, and to capture the actions to be delivered in the coming six months in support of achievement of GMS ambitions.

Performance Summary:

Priority 1 (Children starting school ready to learn):
- Performance against the agreed milestones has mainly gone well in the first six months delivery, and many of the actions to be achieved by 2020 are deemed to be on track, although successful delivery of many of these actions is reliant on extensive and diverse partnership working arrangements and delivery commitments across a range of GM agencies. The notable exception, given a red RAG rating, is the action to develop a single, consistent and high quality workforce development programme; corrective action is focusing on developing a comprehensive ask of government and local partners to deliver against the ambition.
- Most of the performance data demonstrate positive progress, but two of the headline indicators are lagging in terms of trajectory towards achieving the stated 2020 targets. Recent improvement in the quality of GM early years settings is a good sign, as it should underpin further progress against the headline ‘good level of development’ measure.

Priority 2 (Young people equipped for life)
- Progress against the 2020 actions under priority 2 are rated green or amber, indicating that they are either on track or progressing towards achieving the action but with some additional support or corrective actions needed.
- The performance indicators show a mixed picture. The proportion of 16-17 year olds who were NEET (not in employment, education and training) at the end of 2017 was slightly higher than the previous year, and significantly above the national average. Whilst progress at Key Stage 2 is positive, Key Stage 4 performance has worsened slightly. The latest data on Looked After Children have not yet been released, but are likely to show that numbers will have increased again, highlighting the need for early intervention and prevention.

Priority 3 (Good jobs, with opportunities for people to progress and develop)
- The actions for this priority are broadly on course to be achieved by 2020, although there are two actions which are amber-rated actions as they have not progressed as initially envisaged.
- Performance indicators suggest that some of GM’s ambitions will not be met without further intervention, particularly around apprenticeships where there has been a marked reduction in the number of starts. The downturn in apprenticeship numbers does, however, mirror the national data, and is driven by employer uncertainty over the introduction of the apprenticeship levy.

Priority 4 (A thriving and productive economy in all parts of Greater Manchester)
- The majority of Implementation Plan actions and performance dashboard targets for this priority are thought to be on track to be achieved. Delays with the GMSF mean that the action to support growth in the regional centre, town centres and strategic employment sites is rated amber. The UK’s decision to leave the EU could threaten achievement of ambitions to grow GM’s trade and investment links with the rest of the world.
- GVA per job stands out as the headline dashboard measure where performance is weaker, reflecting GM’s enduring productivity gap. Brexit could impact across the suite of indicators, threatening currently strong performance on employment, business growth and inward investment. The aggregate GM reporting also masks considerable variance across both localities and population groups, highlighting the importance of addressing the distributional aspects of growth across GM.

Priority 5 (World-class connectivity that keeps Greater Manchester moving)
• The Implementation Plan actions are either on track, or flagged as amber for achievement of the actions by 2020. The actions shown as amber are reliant on discussions with government regarding establishing a new GM Transport Fund, confirming a long term investment plan with TfN and government to establish GM at the heart of future HS2 and Northern Powerhouse Rail (NPR) networks, and improving performance of our transport networks.
• The performance indicators demonstrate a mixed picture, although good progress is highlighted against the targets for particulate matter (PM2.5) and median download speeds across fibre, mobile and wireless.

Priority 6 (Safe, decent and affordable housing)
• There have been delays in progressing actions related to delivering the housing needs of residents, particularly due to delays in establishing the GM Place team and GMSF. Good progress has however been made against the homelessness and rough sleeping actions under this priority, with these 2020 actions on track.
• Updated data are not yet available on either of the two headline Performance Report measures, but the latest reported data indicate that GM is on track to deliver against its net additional homes target. Conversely, while we are thought to be on course to deliver the Implementation Plan actions on homelessness and rough sleeping by 2020, the latest (2017) data show that performance against the target to end rough sleeping by 2020 is lagging significantly.

Priority 7 (A green city-region and a high quality culture and leisure offer for all)
• GM appears to be on track to meet most of its Implementation Plan milestones and performance targets under this priority. Actions currently rated as amber, are reflective of the scale of the work required in order to achieve the 2020 action.
• However, we perform significantly below the national average on local renewable energy production, and the action to accelerate deployment of energy generation / efficiency technologies is flagged as amber.

Priority 8 (Safer and stronger communities)
• GM is thought to be on track to deliver the Implementation Plan actions in this area by 2020, with the exception of two amber-rated actions: development of tailored responses to meet the needs of victims of crime; and implementation of a consistent approach to complex safeguarding.
• Updated performance indicators show that personal crime has reduced over the last year and is significantly below the national comparator. However, household crime has increased (although some of this increase may be down to improved police recording), with the gap between GM and the national position widening.

Priority 9 (Healthy lives, with quality care available for those that need it)
• Good progress is being made on a number of the Implementation Plan actions and key indicators, but some risks are flagged where we are thought not to be on track to deliver our 2020 ambitions. Of the actions flagged as amber: the establishment of a fully integrated health and social care system, where variability in Local Care Organisation development is a concern; and progress in reconfiguring acute services to deliver more consistent clinical standards across GM settings.
• Updated data were not available on the three headline premature mortality measures in the Performance Report, and impact of health and social care transformation activity on these areas will only be demonstrated in the medium to longer-term. However, of those measures that have updated, the majority demonstrate improvement, albeit not yet at the pace required to meet 2020 targets or to address the gap with the national average.

Priority 10 (An age-friendly Greater Manchester)
• GM is generally thought to be on track to deliver its Implementation Plan ambitions under this priority, although progress in developing ten locality plans for age-friendly neighbourhoods is behind target and rated amber.
• In terms of the Performance Report measures, GM’s progress is generally slightly behind target (shown as amber), with the exception of the employment rate for 50-64 year-olds, where performance has been stronger than expected.

Enablers and ways of working
• The 2020 actions are largely deemed to be on track and rated either green or amber. Amber actions are generally reflective of the scale of change required to achieve the 2020 target, or where some progress has, to date, been slower than expected. However, two actions are rated red: development of integrated whole system approaches to budget setting and resource management; and agreement of a long-term devolutionary settlement, including policy freedoms and flexibilities, financial settlements, fiscal tools and regulation. Both depend upon the support and active involvement of government. GM continues to actively engage in the Budget and Spending Review processes and positive discussions are ongoing with a number of departments, it is not thought likely that there will be significant progress with devolution or long-term budget setting, given the government’s focus on preparations for leaving the EU.
Priority 1 (Children starting school ready to learn):

- Performance against the agreed milestones has mainly gone well in the first six months delivery, and many of the actions to be achieved by 2020 are deemed to be on track, although successful delivery of many of these actions is reliant on extensive and diverse partnership working arrangements and delivery commitments across a range of GM agencies. The notable exception, given a red RAG rating, is the action to develop a single, consistent and high quality workforce development programme; corrective action is focusing on developing a comprehensive ask of government and local partners to deliver against the ambition.
- Most of the performance data demonstrate positive progress, but two of the headline indicators are lagging in terms of trajectory towards achieving the stated 2020 targets. Recent improvement in the quality of GM early years settings is a good sign, as it should underpin further progress against the headline ‘good level of development’ measure.

Priority 1 - Children starting school ready to learn

GMS targets

By 2020, we will meet or exceed the national average for the proportion of children reaching a ‘good level of development’ by the end of reception.

68.0% of children in GM had reached a ‘good level of development’ by the end of reception, as of 2018.

3.5 percentage points below the national average.

0.5 percentage points higher than 2017.

| Proportion of children who are school ready at 5 years old (2018) and percentage point change on the previous year |
|---|---|---|
| Bolton | 67.5 | 1.4 |
| Bury | 70.9 | 2.2 |
| Manchester | 66.8 | 0.7 |
| Oldham | 64.1 | 0.4 |
| Rochdale | 68.2 | 2.4 |
| Saltford | 67.4 | -0.2 |
| Stockport | 70.0 | -1.6 |
| Tameside | 65.7 | -0.3 |
| Trafford | 75.3 | 2.3 |
| Wigan | 68.6 | -0.7 |
| GM | 68.0 | 0.5 |
| England | 71.5 | 0.8 |

By 2020, 70 fewer very small babies will be born every year, narrowing the gap with the projected national average for the number of low birth weight, at term births.

3.0% (873) of live births at term were low birth weight (<2500g) in 2016.

0.1 percentage points ahead of the expected target trajectory.

0.1 percentage points (16) fewer than 2015.

| Proportion of at term births that were low birth weight (<2500g) in 2016 |
|---|---|---|
| Bolton | 2.9 |
| Bury | 2.4 |
| Manchester | 3.3 |
| Oldham | 3.7 |
| Rochdale | 3.3 |
| Saltford | 2.8 |
| Stockport | 2.0 |
| Tameside | 2.2 |
| Trafford | 2.2 |
| Wigan | 2.9 |
| GM | 3.0 |
| England | 2.8 |

By 2020, all early years settings will be rated ‘good’ or ‘outstanding’ by OFSTED, an increase from 90% in 2016.

93.6% of early years settings were rated as ‘good’ or ‘outstanding’ as at March 2016.

0.3 percentage points behind the expected target trajectory.

2.0 percentage points higher than March 2017.

% of inspected providers rated as good or outstanding as of March 2018, and percentage point change since March 2017.

Supporting indicators

As of Q1 2018/19, 11.9% of GM mothers were known to be smokers at the time of delivery, down 0.5 percentage points compared to the same quarter in the previous year.

1.5 percentage points above the England average.

The rate of dental extractions with decay as the primary diagnosis amongst GM 0-4 year olds was 33 per 10,000 in 2016-17, largely unchanged when compared to the previous year.

50% higher than the England average (22 per 10,000).

Context and challenges

- Greater Manchester has seen an improvement in school readiness from 47.3% in 2013 to 68.0% in 2018. However, although the gap with the national average narrowed from 4.4 percentage points in 2013 to 3.2 in 2017, it remains significant and has increased slightly over the last year (to 3.5 percentage points). There is considerable variance both across and within localities, and a strong correlation between lower levels of school readiness and deprivation. In order to meet or exceed the national average by 2020, collective effort across all GM districts will be required.

- Positive improvement has been seen across the majority of indicators reported, with a significantly higher proportion of early years settings rated ‘good’ or ‘outstanding’ by OFSTED, which should support further improvement in school readiness as these children move into compulsory education. However, GM still lags the national average on all measures, most particularly on smoking in pregnancy and children’s oral health, both of which are priority areas under the GM Population Health Plan.

- Improved early years outcomes are a fundamental foundation for achieving our ambitions across the GMS priorities. We are producing a comprehensive school readiness plan to deliver the investment and implementation of reforms required to drive improvements in school readiness in every part of GM; as part of this plan, we are engaging with schools to support them to become leaders in early years, and developing a consistent workforce development programme for roll-out to place-based teams and early years settings.
Priority 2 (Young people equipped for life)

- Progress against the 2020 actions under priority 2 are rated green or amber, indicating that they are either on track or progressing towards achieving the action but with some additional support or corrective actions needed.
- The performance indicators show a mixed picture. The proportion of 16-17 year olds who were NEET (not in employment, education and training) at the end of 2017 was slightly higher than the previous year, and significantly above the national average. Whilst progress at Key Stage 2 is positive, Key Stage 4 performance has worsened slightly. The latest data on Looked After Children have not yet been released, but are likely to show that numbers will have increased again, highlighting the need for early intervention and prevention.

### Priority 2: Young people equipped for life

| By 2020 we will... (RAG rating on overall progress towards achieving 2020 Action) | Comment on assessment of GM’s ability to achieve 2020 action | Apr - Sep 2018 Milestone | Apr - Sep 2018 Milestone Performance Update | New Milestone | Oct 2018 - Mar 2019 |
| --- | --- | --- | --- | --- |
| • Put in place a flexible yet consistent approach to the commissioning of Children’s and Young People’s services embedded across GM, ensuring more young people get the right support at the right time | Activity is currently slow due to the complexity of linking all commissioning services. Corrective actions and plans are in place to increase activity | Identified opportunities to improve young people’s transitions into early adulthood through GM commissioning processes | Through the work of the Education & Employability Board and the Reform Board there is now more focus on how as GM partners we commission more smartly to ensure young people gain the right support. The Youth Combined Authority is working with health and care leavers to highlight the barriers that commissioning creates. | • Report progress on commissioning with health, particularly around mental health to Reform Board, and agree delivery of joint actions and next steps |
| • Develop and implement GM model for enabling school improvement, including raising attainment of English, maths and digital | Changes to GCSE recording has had an impact on results this year. There is a good amount of activity to support this priority. | Developed an outline proposal with schools and DCS’ around a model to enable GM School Improvement model | Established an Education and Employability Board. Work has been focused around data analysis; combining analysis from local Children’s Services with GMCA and Manchester University work on educational outcomes for specific groups. Early work in maths is being developed, as well as approaches to a GM model for school improvement. | • Education & Employability Board activity to focus on improved pupil outcomes in schools |
| | | | GMCA has commissioned work to support the talent pipeline in digital as well as teachers at a value of £600K which is out on the Chest now. Work underway with DfE to ensure projects that are providing support to Alternative Provision facilities are aligned with GM. | • Life Readiness strands to target support for less advantaged young people |
| | | | Began roll out the iDEA digital enterprise award programme to all secondary school students across GM | • GM Careers Hub is working with 36 schools/colleges |
| | | Stakeholder workshop held to promote iDEA and develop partner action plans. LAs are starting to roll out iDEA across their areas. Progress slower than expected due to lack of capacity, which will be rectified by end-2018. | • Continued focused activity on maths in schools and colleges, through work with GM Colleges Group and Education & Employability Board |
| • Develop and embed Curriculum for Life (CfL) from primary to post 16; that encompasses universal support and a more targeted offer for those that need it | Activity is on track to achieve 2020 action | Design and develop the CfL with a view to commissioning in early 2019, capturing views of young people, schools and partners | CFL designed in consultation with the Youth Combined Authority and is now at the implementation stage. Programme manager appointed to support with this work. | • Develop CfL implementation plan. Focus on development of good examples of experiences of the world of work |
| | | | Consultation completed and the Careers Portal is now at a draft specification point. A market engagement event will be held in October. Work is on track to implement the portal from September 2019. | • Market engagement and tender process for CfL. |
| • Expanded roll out of BridgeGM | Activity is on track to achieve 2020 action | Consulted and gone out to commission a Young Person’s Career Portal, including a UCAS Style Application Process | The number of schools/colleges working with GMCA is currently 125/230 and expected to be at least 180 by December 2018. | • Continue to roll out Bridge GM until full capacity |
| | | | | • Year 1 of Bridge GM Careers Hub – 36 schools and colleges implement a robust Careers Programme meeting the Gatsby Benchmarks |

### Milestones

- Oct 2018 - Mar 2019 Milestone: Consultation completed and the Careers Portal is now at a draft specification point. A market engagement event will be held in October. Work is on track to implement the portal from September 2019.
- Apr - Sep 2018 Milestone: Through the work of the Education & Employability Board and the Reform Board there is now more focus on how as GM partners we commission more smartly to ensure young people gain the right support. The Youth Combined Authority is working with health and care leavers to highlight the barriers that commissioning creates.
- Apr - Sep 2018 Milestone: Identified opportunities to improve young people’s transitions into early adulthood through GM commissioning processes.
- Apr - Sep 2018 Milestone: Established an Education and Employability Board. Work has been focused around data analysis; combining analysis from local Children’s Services with GMCA and Manchester University work on educational outcomes for specific groups. Early work in maths is being developed, as well as approaches to a GM model for school improvement.
- April - Sep 2018 Milestone: Activity is currently slow due to the complexity of linking all commissioning services. Corrective actions and plans are in place to increase activity.

### 2.5 Significantly improve GM’s technical education offer, with high quality apprenticeships and T-level qualifications; working with the business and skills sector to ensure people gain the skills, knowledge and experience that employers need

- GM’s technical education offer
- High quality apprenticeships and T-level qualifications
- Working with the business and skills sector
- To ensure people gain the skills, knowledge and experience that employers need

- Delays in DfE timetable puts this action at risk.
- Scoped three initial occupational routes for T-level provision
- Developed a programme of engagement with employers to drive Apprenticeship take up
- Rolled out three Public Sector Flagship apprenticeship programmes

### 2.6 Design and deliver a consistent offer for care leavers across GM

- Activity is on track to achieve 2020 action
- Consistent offer scoped by a new Looked After Children / Care Leavers Board
- Completed evaluation of Looked After Children analysis tool and prepared the case for wider roll out
- Work with DCS’ to develop and implement a plan for more efficient and effective management of the LAC placement market

- GM Care Leavers Trust established to oversee this area of work and develop an agreed standard for GM’s Care Leavers. Project Manager also appointed to drive this work forward.
- Analyst workbench successfully launched as pilot in all localities. User survey completed to inform functionality. Individual evaluation of impact underway. Direct import of data from council being tested by MCC.
- Enhanced offer of support for GM’s LAC / care leavers is in development with partners from health, housing, transport, JCP.

### Achievements

- GM Employment & Skills Advisory Panel established with DfE & DWP representation
- Developed Industrial Placement Strand, through planned events.
- Developed employer engagement strands and identified three T level champions from industry.
- Knowledge & understanding of technical and vocational pathways improved in schools, through the Careers Hub
- Create at least 500 apprenticeship starts by Mar 2020, through launch and delivery of SME apprentice support package. Engagement with levy payers to understand issues, influence levy spend and identify transfer / pooling options
- Action plan developed and delivered to promote apprenticeship opportunities in the public sector.
- Began work with Institute for Apprenticeships to ensure standards meet needs of GM employers.
- Employer engagement CPD programme launched, ensuring high quality, impartial advice to business.
- Core entitlement developed allowing more Care Leavers apprenticeship access.
- Targeted support commissioned for less advantaged young people across GM to increase their career opportunities and progression.

### Ongoing Conversations

- Work underway to develop a support package to increase the volume of apprenticeships within SMEs. Joint meetings with National Apprenticeship Service account manager and GM’s large levy payers have begun to better understand their perspective and encourage levy investment within GM
- Developed pilot models for flexible apprenticeships (e.g. part time roles)
- Work in progress - now need to encourage public sector organisations to adopt the model.

- GM has a successful Careers Hub. A Hub lead has been appointed and a launch held on 3rd October. 36 schools and colleges are involved.
- Consistent offer scoped by a new Looked After Children / Care Leavers Board
- GM Care Leavers Trust established to oversee this area of work and develop an agreed standard for GM’s Care Leavers. Project Manager also appointed to drive this work forward.
- Analyst workbench successfully launched as pilot in all localities. User survey completed to inform functionality. Individual evaluation of impact underway. Direct import of data from council being tested by MCC.

- Work with DCS’ to develop and implement a plan for more efficient and effective management of the LAC placement market
- Enhanced offer of support for GM’s LAC / care leavers is in development with partners from health, housing, transport, JCP.

### Pending

- Final report and recommendations of LAC / care leavers offer assessed by Directors’ of Children’s Services.
- Work with DCS’ to develop and implement a plan for more efficient and effective management of the LAC placement market

### Action Plan

- Care leavers offer rolled out across GM
- Independent evaluation completed.
- Final report and recommendations assessed by DCS’. Pending decision to proceed and funding agreement, a procurement exercise will take place in January 2019.
- Final report and recommendations of LAC / care leavers offer assessed by Directors’ of Children’s Services.

| 2.8 Develop a targeted offer for young people who require the support of multiple services, ensuring that all individuals are supported to achieve their potential, including those at risk of NEET, NEET and those hidden young people | The latest NEET data has not yet been published, but the milestones and indicators suggest more needs to be done to achieve the GMS target reduction | Initiated the development of a Further Education strategy for prevention / early intervention of mental health issues | 1. Good progress made on the Life Ready agenda at the Reform Board and with partners. Commitment has been made to focus initial activity on: Curriculum for life with a focus on Experience of the world of work; Care Leavers Guarantee; Life ready measurement. 2. A schools mental health pilot has been commissioned to look at a rapid response model within schools. 3. ESF NEET provision is doing well and a new contract will be commissioned through the ESFA for 2019. 4. Digital Skills has been commissioned for a talent pipeline supporting young people to engage with digital and ensure teachers have a good understanding of the industry. |
| | Worked with JCP on a youth obligation offer across GM | Limited progress as there is no clear Youth Obligation at present with JCP. |
| | Work with the VCSE sector around the ‘hidden young people’ research report to identify the need for a targeted offer | Targeted offer developed. Application made to Big Lottery for funding; stage 1 successful, stage 2 submitted. Suitable GM match funding identified (Youth Contract). Also supporting development of Career Portal to ensure it meets needs of this group. |

- Early Intervention & Prevention Strategy revisited by GM Children’s Programme, to establish ways of embedding core elements / principles within wider place based delivery model
- GM NEET strategic action plan agreed
- Data Visualisation pilot for complex families completed and evaluation produced.
- Additional baselining with all GM Districts completed.
- Pending approval to proceed and funding agreement, procurement to begin Jan 2019, with view to rolling out GM wide solution.
- BridgeGM extended to ensure reach to all GM schools & colleges; with a view for targeted careers support for disadvantaged young people.
- Education & Employability Board focus on disadvantaged young people and approach to share best practice & raise attainment in schools.
- Deliver targeted support for flexible apprenticeships for learners with learning difficulties or disabilities.
- Designed and developed Careers Portal, for UCAS style system across GM.
- Continued joint working with JCP to develop Youth Obligation offer
- Secure Big Lottery funding and suitable GM match funding to deliver developed target offer
- Work with LAs to finalise a collaborative action plan as part of the GM NEET action plan development
Priority 2 – Young people equipped for life

GMS targets

By 2020, there will be 1,000 fewer looked after children in GM, a reduction of more than 20% on 2016 levels

As of March 2017, there were 5,245 looked after children in GM, up by 135 compared to March 2016
8.5% behind the target trajectory

Rate per 10,000 children <18

By 2020, the number of 16-17 year-olds who are NEET (not in education, employment or training) will be below the national average in all GM districts, as will the number whose activity is not known to the local authority

By 2020, the number of unemployed 16-19 year olds will have fallen from 13,300 in 2016 to 12,000, a reduction of 10% over the period

17.3% (9,400) of economically active 16-19 year olds in GM were unemployed in the year to June 2016, down from 27.0% (14,500) for the previous year

Accordingly, 6.1 percentage points ahead of the target trajectory

19.6% for males
15.0% for females

Supporting indicators

24,372 bed days for children and young people aged under 18 in CAMHS tier 4 wards in the year to March 2018. This equates to 384 per 10,000 children <18, up from 252 for the previous year, but below the England average for the year to March 2018 of 392

The average Progress 8 score for GM Key Stage 4 pupils in 2017/18 was -0.16**, indicating that pupils made 0.16 of a grade less progress than the national average this year.

This was lower than the average score of -0.11 in 2016/17

Context and challenges

- A survey of Year 10 pupils in GM secondary schools is being rolled out, and will collect data on the proportion with ‘hope and optimism’ for the future. This indicator will be introduced to the dashboard when full baseline is available, and the wider set of measures will be reviewed in light of developments under the GM life readiness workstream. This aims to support all young people to succeed, particularly in preparation for the transition from compulsory schooling to further education, training and employment opportunities; the GM Youth Combined Authority is centrally involved, not least in development of a ‘Curriculum for Life’ from primary age to post-16.
- 2017/18 data on looked after children (LAC) were not available for this update, but are likely to show GM numbers increasing for a second consecutive year, following the reduction seen over the 2016-17 period. Analysis will be undertaken when the data are published, including comparison with national trends, and understanding key drivers of change and the potential role played by unaccompanied asylum seeking children in inflating the figures. The GMS Implementation Plan includes a strong emphasis on early intervention and prevention, although it will take time before this will have a significant impact on LAC numbers.
- Educational performance is relatively strong at Key Stage 2. Key Stage 4 outcomes underperform the national average, although GM is in line with other core cities with the exception of London, where exceptional performance is driving the England average upwards. There is significant variance across and within GM districts.
- The proportion of 16-17 year olds who were NEET (not in education, employment or training) at the end of 2017 increased slightly compared to the previous year. Conversely, the proportion whose activity was ‘not known’ decreased significantly, although this may be due to local variations no longer being required to track academic age 18-year-olds.
- The life readiness work should also pay dividends in supporting youth employment; despite significant recent improvement, around one in six economically active 16-19 year olds in GM (i.e. excluding those still in education) were unemployed in June 2018. Significant mental health investment will support achievement of GM’s ambition that no child needs mental health support will be turned away, and will include a new schools mental health pilot that will provide a rapid response model within schools.
Priority 3 (Good jobs, with opportunities for people to progress and develop)

- The actions for this priority are broadly on course to be achieved by 2020, although there are two actions which are amber-rated actions as they have not progressed as initially envisaged.
- Performance indicators suggest that some of GM’s ambitions will not be met without further intervention, particularly around apprenticeships where there has been a marked reduction in the number of starts. The downturn in apprenticeship numbers does, however, mirror the national data, and is driven by employer uncertainty over the introduction of the apprenticeship levy.

**3.7 Develop a GM approach to managing welfare reform that delivers job progression and addresses low pay**

- Early Help programme implemented ready for the start date of early March 2019
- Should funding be confirmed, commence the commissioning and procurement of a GM Specialist Employment Service for people with learning disabilities, people with severe mental illness and autistic people.
- Develop pathways for embedding sport and physical activity between Local Delivery Pilots and Working Well.
- Subject to CA agreement, further development of Welfare Reform action plan and commence delivery
- Finalise priorities in Welfare Reform action plan, subject to CA agreement, and agree process for management and updating of the plan.
- Continued development of welfare reform dashboard as new data and intelligence becomes available.
  - Use in-work progression trial to understand how UC in-work allowances have and will affect the employment activities of claimants
  - Work with local providers of business start-up support to gather evidence of impact of UC self-employment rules, and agree actions for the GM Welfare Reform Action Plan
  - Key lines of enquiry established to test new service offers and initial pilots agreed.
  - Work with CAB to agree a GM approach to Universal Support

**GM Welfare Reform Dashboard and Network**

- GMCA and GM HSCP established.
- The group has been pivotal in developing a GM Welfare Reform Action Plan and will own some of the actions within.
- The GM Welfare Reform Dashboard has been developed and is updated quarterly.
- Other intelligence and evidence from frontline partners will add value to this and inform priorities and activity.
- Meeting held with Growth Hub to discuss impacts of UC self-employment rules.
- Further action on this was put on hold until government’s response to the Work and Pension Committee’s report was published (late August). The in-work progression trial planned (above) will help us to understand the journey and support needs for UC in-work claimants.
- Steering and Operational Groups established with GMCA, DWP, DfE, MHCLG, JCP and CfAB. 5 year test and learn programme agreed and funding secured from CfAB for initial evidence review phase. Evidence review commissioned in Sept.
Priority 3 – Good jobs, with opportunities for people to progress and develop

**GMS targets**

By 2020, median resident earnings (all employees) will exceed £23,000, up from £21,585 in 2016.

<table>
<thead>
<tr>
<th>Median earnings of GM residents (all employees)</th>

</tbody>
</table>

35.0% of GM working-age residents (£20,000) had a Level 4+ qualification in 2017.

1.6% behind the expected target trajectory.

0.4 percentage points (9,000) above the 2016 position.

By 2020, there will be 70,000 more GM working-age residents with Level 4+ qualifications, an increase from 34.8% of the working-age population in 2016 to 38.3%.

By 2020, there will be at least 50,000 fewer GM working-age residents with qualifications below Level 2, a reduction from 27.7% of the working-age population in 2016 to 24.5%.

By 2020, more than 40,000 GM residents per annum will start an apprenticeship, and the achievement rate for apprenticeship programmes will reach 75%. This compares to 30,378 apprenticeship starts in 2015/16, and an achievement rate of 66.4%.

**Supporting indicators**

18.2% of working age residents in GM had Level 3 as their highest level of qualification in 2017, above the England average of 17.3% and up from 18.0% the previous year.

4.6% of economically active GM working-age residents were unemployed in June 2018, above the England average of 4.3%, but down from 5.6% for the previous year.

3.1% of GM working-age residents (55,000) were claiming unemployment benefits* in September 2018, above the England average of 2.2% and higher than the September 2017 rate of 2.6%.

**Context and challenges**

- Whilst GM skills levels have improved steadily since 2004, relative performance remains poor. There are identified skills gaps in several key sectors, including construction, digital and hospitality, along with some public service areas such as nursing. Policy is focused on reducing gaps and shortages, especially in technical roles (Level 3 and 4).
- GM will assume responsibility for Adult Education Budget (AEB) commissioning in 2019, providing further opportunity to target development of the skills required by local employers and key sectors, and to reduce the currently significant proportion of ‘second-chance’ provision and lower-level skills. Over time, this will also be supported by further improvements in ‘school readiness’ and subsequent attainment in compulsory education.
- The downturn in apprenticeship starts is mirrored in the national data, and is driven by employer uncertainty over the introduction of the apprenticeship levy. An apprenticeship action plan has been developed to increase both quality and volumes, and includes an SME support programme, a public sector apprenticeship approach and a new digital talent pipeline. Dialogue with government as part of the GM Local Industrial Strategy will focus on designing a system to meet local needs and address growth ambitions.
- The ILO unemployment rate is at its lowest level for 15 years, although the roll-out of Universal Credit is inflating the claimant count as more people are required to look for work. By August 2018, Working Well had supported more than 3,200 people into employment, and the new Work and Health programme had received over 3,000 referrals. The GM Employer Charter is being co-designed with employers and employees, and will support achievement of GM’s ‘good work’ ambitions.

*Job Seekers Allowance and unemployed Universal Credit claimants.
Priority 4 (A thriving and productive economy in all parts of Greater Manchester)

- The majority of Implementation Plan actions and performance dashboard targets for this priority are thought to be on track to be achieved. Delays with the GMSF mean that the action to support growth in the regional centre, town centres and strategic employment sites is rated amber. The UK’s decision to leave the EU could threaten achievement of ambitions to grow GM’s trade and investment links with the rest of the world.
- GVA per job stands out as the headline dashboard measure where performance is weaker, reflecting GM’s enduring productivity gap. Brexit could impact across the suite of indicators, threatening currently strong performance on employment, business growth and inward investment. The aggregate GM reporting also masks considerable variance across both localities and population groups, highlighting the importance of addressing the distributional aspects of growth across GM.

### By 2020 we will... (RAG rating on overall progress towards achieving 2020 Action)

</table>
**Priority 4 – A thriving and productive economy in all parts of Greater Manchester**

**GMS targets**

- **By 2020, GVA per job** will have increased by at least 6%, compared to the 2015 baseline. *Note: the original target and baseline have been revised due to methodological changes in GVA measurement, but the scale of the target remains unchanged.*

- **GVA per job** was **£44,072 in 2016 (GMFIM-2018)**.

- **By 2020, 60,000 more GM employees will be earning above the Real Living Wage. An increase from 75.6% of employee jobs in 2016 to 80%**.

- **78.2%** of employee jobs (18) working in GM (890,000) were earning above the Real Living Wage in 2017.

- **50,000** ahead of the target trajectory

- **2.6 percentage points (60,000)** higher than in 2016

- **1,324,000** GM residents (19+) were in employment in the year to June 2018.

- **3.1% (40,000)** ahead of the target trajectory

- **2.5% (32,000)** higher than in June 2017

- **By 2020, there will be at least 5,000 more business start-ups pa compared to 2015 levels, an increase from 90 start-ups per 10,000 GM working-age residents to 117 or more**.

- **By 2020, GVA generated from inward investment job creation and safeguarding in GM in 2017/18**

- **£337m** in GVA was generated from inward investment (domestic and FDI) job creation and safeguarding in GM in 2017/18.

- **14.3%** ahead of the target trajectory, and up £46m from 2016/17.

**Supporting indicators**

- **The employment rate for working age residents in GM from ethnic minority groups was 59.6% in the year to June 2018, below the England average of 65.5%, but broadly comparable to the previous year (59.8%).**

- **The employment rate for working age residents in GM with a disability* was 48.8% in the year to June 2018, below the England average of 53.7%, up from 47.0% in the previous year.**

- *** Equality Act core or self-identifying disabled.**

**Context and challenges**

- GMFIM-2018 outputs show that productivity in GM declined slightly between 2015 and 2016, as did for the UK as a whole. The GM productivity gap continues, with GVA per job in GM falling consistently at around 90% of the UK average over the last decade. If GVA per head in GM were the same as the national average, GM’s economy would be a fifth larger. GM’s Local Industrial Strategy will take a deep-dive into productivity performance, and identify key policy levers that could enhance future growth.

- Good performance against the other GMS headline targets in part reflects the conservative nature of these targets, which were developed in 2017 and align with the cautious forecasts outlined in the 2017 Greater Manchester Forecasting Model (GMFIM) in light of Brexit uncertainty. To date, the GM economy has proved more resilient than anticipated, although Brexit could have a significant dampening effect moving forward – government forecasts suggest that GDP in the North West will be between 2.5% and 12% lower over the next 15 years, depending on the nature of the trade deal we agree with the EU.

- New data for the Real Living Wage, business start-ups and business density (number of enterprises per 10,000 working-age residents) measures have not yet been released. Employment outcomes for the adult population are positive, and the June 2018 gap of 1.0 percentage points between the GM employment rate and the England average is the lowest for more than a decade. However, between June 2017 and June 2018 the employment rate decreased in 3 districts, and employment of disabled people and residents from ethnic minority groups is well below national rates, illustrating the need to address distributional variation in growth across GM. Growth in the regional centre, strategic employment sites and town centres will be driven by a range of activity including the Local Industrial Strategy, Productivity and Inclusive Growth programme, and the Town Centre Challenge.
## Priority 5 (World-class connectivity that keeps Greater Manchester moving)

- The Implementation Plan actions are either on track, or flagged as amber for achievement of the actions by 2020. The actions shown as amber are reliant on discussions with government regarding establishing a new GM Transport Fund, confirming a long term investment plan with TfN and government to establish GM at the heart of future HS2 and Northern Powerhouse Rail (NPR) networks, and improving performance of our transport networks.
- The performance indicators demonstrate a mixed picture, although good progress is highlighted against the targets for particulate matter (PM2.5) and median download speeds across fibre, mobile and wireless.

<table>
<thead>
<tr>
<th><strong>Context and challenges</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>The majority of measures have been updated for this version of the Performance Report, with the exception of the proportion of people using modes of transport other than the car to travel to work, and the proportion of GM residents that had all five basic digital skills. The updated transport data confirm the need for GM’s current focus on active travel, with slight reductions in the proportion of journeys made by walking, cycling or public transport, and in short journeys completed by walking or cycling; conversely, congestion on GM’s roads has edged up slightly. In response, a significant investment programme for cycling and walking is being put in place, driven by the GM Cycling and Walking Commissioner’s Made to Move strategy, and incorporating the Mayor’s Cycling and Walking Challenge Fund and development of the cycling and walking network. Implementation of measures under the GM Congestion Plan are ongoing, and significant capital investment is supporting new and renewed transport infrastructure. Plans for bus reform and smart ticketing on Metrolink are progressing and will support development of a more integrated network and better-connected city region.</td>
</tr>
<tr>
<td>Tackling poor air quality is a key GM priority. GM local authorities are working with TIGM to develop a Clean Air Plan, which will accelerate activity already being taken forward under the GM Low Emission Strategy, Air Quality Action Plan and Congestion Plan.</td>
</tr>
<tr>
<td>GM has secured £23.8m investment to fund full-fibre connectivity to businesses and homes across GM – this is critical to establishing the kind of data-intensive activities that are necessary for a truly world-leading digital city-region, and is one of the key priorities of the GM Digital Strategy. The Strategy also focuses on digital inclusion, and work is ongoing to develop an all-age, place-based digital inclusion programme.</td>
</tr>
</tbody>
</table>
Priority 6 (Safe, decent and affordable housing)

- There have been delays in progressing actions related to delivering the housing needs of residents, particularly due to delays in establishing the GM Place team and GMSF. Good progress has however been made against the homelessness and rough sleeping actions under this priority, with these 2020 actions on track.
- Updated data are not yet available on either of the two headline Performance Report measures, but the latest reported data indicate that GM is on track to deliver against its net additional homes target. Conversely, while we are thought to be on course to deliver the Implementation Plan actions on homelessness and rough sleeping by 2020, the latest (2017) data show that performance against the target to end rough sleeping by 2020 is lagging significantly.

### Priority 6: Safe, decent and affordable housing

Supporting indicators

In December 2017, the ratio of lower quartile house prices to median incomes in GM was 4.3, compared to the England average of 5.2. Affordability in GM declined slightly compared to 2016, when the ratio was 4.1.

In 2018/17, 0.8% of GM housing stock (10,827 properties) had been empty for over 6 months, compared to 0.86% for England as a whole.

A decrease of 332 properties since 2015/16

In Q1 2018, positive action was successful in preventing or relieving homelessness in 4,871 cases, a rate of 4.1 per 1,000 households, compared to 2.4 for England as a whole.

Up on the previous year by 116 cases

In March 2018, there were 238,600 people in receipt of housing benefit in the housing element of Universal Credit, a rate of 85 per 1,000 of the population, compared to 71 nationally.

The gap between GM and the national average closed by 9% when compared to March 2017

Context and challenges

- The majority of measures that have been updated for this version of the Performance Report show positive progress, including a reduction in the proportion of empty properties, closing of the gap with the national average for the number of people claiming housing benefit (albeit that a significant gap remains), and an increase in the proportion of residents stating that they liked the neighbourhood where they lived.
- Consultation on the revised Greater Manchester Spatial Framework (GMSF) will take place in autumn 2018, with the aim of ensuring that we have the right land available in the right places to deliver the homes and jobs needed by the city-region up to 2035. The headline measure on net additional dwellings has not updated for this Performance Report, but the significant increase between 2015/16 and 2016/17 indicated that we were on track towards the target of delivering more than 10,000 new homes by 2020.
- The rough sleepers data (which have also not yet updated) are not particularly robust, and local intelligence suggests that there may be as many as 500 rough sleepers across GM, around double the official count. A three-year strategy to end rough sleeping and reduce homelessness has been agreed, driven by the GM Homelessness Action Network, and our rough sleeping social impact bond has resettled 112 rough sleepers by August 2018. Winter planning is a key focus, and it is imperative to ensure that sufficient cold weather provision is in place across GM so we can provide accommodation for those who need it. Homelessness prevention activity includes the development of pathways for key groups, including young people, ex-offenders and people with mental health needs. Work is also ongoing to improve our intelligence on rough sleeping and homelessness – more robust and timely data is necessary to track the amount of available accommodation and understand how this relates to the number of rough sleepers at a particular point in time.
**Priority 7 (A green city-region and a high quality culture and leisure offer for all)**

- GM appears to be on track to meet most of its Implementation Plan milestones and performance targets under this priority. Actions currently rated as amber, are reflective of the scale of the work required in order to achieve the 2020 action.
- However, we perform significantly below the national average on local renewable energy production, and the action to accelerate deployment of energy generation / efficiency technologies is flagged as amber.

</tr>
</tbody>
</table>

Context and challenges

- New data were available for around half of the Priority 7 measures reported above. Performance remains on track in terms of achieving the 2020 target for CO₂ emissions, although much of the carbon reduction reported is due to national measures, decarbonisation of the grid, and warmer weather, which reduces the need for heating. We are now considering longer term ambitions, including progressing actions agreed at the March 2018 Green Summit.
- GM still falls significantly behind the national average for local renewable energy production, although again the position has improved since previously reported. Our response includes proposals to create a GM Energy Company, development of a Smart Energy Plan, and piloting smart energy generation systems through an Energy Transition Region.
- Reported life satisfaction in GM has seen a significant improvement, but remains below the national average. There is also considerable variance across GM districts.
- The key challenge for the visitor economy is to maintain growth in day and staying visits. Business visits in particular have seen little recent growth. We need to remain competitive, increase our profile and introduce new product. Recruitment and retention of staff is an issue, and will be further exacerbated by Brexit.
- Under the Great Place initiative, we are developing a new approach to assessing levels of engagement with culture, which will enable us to target our resources more effectively and address significant variation by geography and population group. Under the current methodology, engagement levels have increased, exceeding target expectations.
Priority 8 (Safer and stronger communities)

- GM is thought to be on track to deliver the Implementation Plan actions in this area by 2020, with the exception of two amber-rated actions: development of tailored responses to meet the needs of victims of crime; and implementation of a consistent approach to complex safeguarding.
- Updated performance indicators show that personal crime has reduced over the last year and is significantly below the national comparator. However, household crime has increased (although some of this increase may be down to improved police recording), with the gap between GM and the national position widening.

### Priority 8: Safer and stronger communities

Priority 8 – Safer and Stronger Communities

GMS targets

In 2016, 11.8% of GM households said they had been a victim of household crime in the past 12 months. 3.9% of GM residents had experienced personal crime.

Over the period to 2020, victimisation rates will be in line with or below the England & Wales average.

13.3% of GM respondents said they had experienced household crime in the year to March 2018, 2.8 percentage points higher than the most recent national figure.

1.4 percentage points higher than March 2017

Household

2.2% of GM respondents said they had experienced personal crime in the year to March 2018, 1.7 percentage points lower than the most recent national figure.

1.2 percentage points lower than March 2017

Personal

[Work is ongoing to develop an outcomes framework to provide insight into the outcomes and commitments made in Standing Together, the new GM Police and Crime Plan (PCP). The PCP outcome measures will draw on a range of data sources including GMP recorded crime, national survey data and locally collected data from across GM. It is anticipated that the framework will receive formal sign-off in Autumn 2018, with baseline data collected before Christmas. A GM residents’ survey on the PCP outcomes is currently going through the procurement process. The PCP framework will complement the GMS Priority 8 outcome indicators; the headline measures used in this dashboard will be updated to align more closely with the PCP outcomes framework once finalised.]

Supporting indicators

[The suite of sub-indicators will be revised to ensure consistency with the PCP outcomes framework.]

Context and challenges

- As noted, the reported indicator set will be revised on finalisation of the PCP outcomes framework.
- Updated data were only available for the two headline measures relating to household and personal crime: personal crime has reduced over the last year and is significantly below the national comparator, but household crime has increased and the gap between GM and the national position has widened. Whilst some of this increase is explained by improved police recording, the data highlight the increased demand on policing, at a time when Greater Manchester Police (GMP) resources are spread thinly following successive years of funding cuts and reductions in the number of front-line officers.
- The refresh of the Justice Devolution MoU is in progress, with new governance arrangements, focused on the Justice and Rehabilitation Outcomes Framework.
- More broadly, a GM Resilience Strategy is in development, which will incorporate findings from the Kerslake Review into the 2017 Manchester Arena bombing.

19% of GM respondents reported feeling ‘unsafe’ in a public location sometime in the past 12 months as of 2015-16

4 percentage points below the national average

5% of GM respondents agreed or strongly agreed with the statement that ‘people in this neighbourhood don’t get along with each other’ in 2014-15

0.9 percentage points below the national average

73% of GM respondents agreed or strongly agreed with the statement that ‘I feel like I belong to this neighbourhood’ in 2014-15

3 percentage points above the national average
Priority 9 (Healthy lives, with quality care available for those that need it)

- Good progress is being made on a number of the Implementation Plan actions and key indicators, but some risks are flagged where we are thought not to be on track to deliver our 2020 ambitions. Of the actions flagged as amber: the establishment of a fully integrated health and social care system, where variability in Local Care Organisation development is a concern; and progress in reconfiguring acute services to deliver more consistent clinical standards across GM settings.
- Updated data were not available on the three headline premature mortality measures in the Performance Report, and impact of health and social care transformation activity on these areas will only be demonstrated in the medium to longer-term. However, of those measures that have updated, the majority demonstrate improvement, albeit not yet at the pace required to meet 2020 targets or to address the gap with the national average.

### Priority 9: Healthy lives, with quality care available for those that need it

#### By 2020 we will...
(RAG rating on overall progress towards achieving 2020 Action)

| Activity | Complete a GM Mentally Healthy Schools Pilot  
Liaison Mental Health roll out to ensure access to mental health support 24/7 for all ages  
Make significant progress to the implementation of core GM standards for children with ADHD  
Significant progress has been made in implementation of the standards across all 10 localities  
Nurse recruitment campaign ‘Be a Greater Manchester Nurse’ launched in June  
Develop a GM benefits programme for current and future staff  
Work underway developing a GM employment offer and benefits programme to support recruitment and retention:  
- Nurse incentives programme, including a recruitment campaign and development of a guaranteed employment scheme  
- Continuous service commitment to support workforce mobility  
- Best practice toolkit developed for employers to support working carers  
- Historic commitment across public sector organisations to tackling workforce race equality as a collective  
- Recognition and raising the profile of the workforce through the first ever GM Health and Care Champion Awards, held July 2018  
Commence Care Academy pilot as part of a programme to establish centre(s) of excellence for workforce development  
Develop quality and excellence through workforce development across social care workforce in GM. Through a Care Academy pilot, a number of initiatives have commenced targeting this part of the workforce. Creating innovative programmes, to develop a talent pool of care workers at entry level as well as a succession planning programme for future leadership  
Set of decisions on future shape of hospital services still need to be taken by Joint Commissioning Board.  
Developed models of care across a range of clinical specialities. These models of care will inform how hospitals can work together to ensure consistent, high quality care  
Eight reviews of models of care have been initiated and four of these have recently been completed.  
Agree resourcing for H&SCP information governance support at appropriate scale and defined the framework for information sharing  
Lack of clarity across GM system on application of information governance rules  
Introduced ERAS+ across a number of sites across GM to enhance pre-operative care for surgery patients, to aid recovery  
ERAS active in 3 sites. GM Leisure+ Partnership and Digital offer scoped. Implementation Support Pack in development to support spread across academic health science network  
Provision of 7 day access to general practice in all parts of GM to provide over 1,500 additional hours of GP and/or Practice Nurse time in addition to core hours.  
All 10 GM localities are delivering 7 day additional access, providing 100% population coverage, equates to £1500 additional hours being delivered each week. Across GM there are currently 50 hubs delivering 7 day access. Work is ongoing to ensure all localities are meeting the national requirements and appropriately advertising / raising awareness of the service.  
At least 50% of GP practices to signpost patients to wider health and care services including community and voluntary sector. We expect this to be 100% of GP practices by the end of the 2018/19  
As part of GP Forward View, a new 5 year £45 million fund has been created to contribute towards the costs for practices of training reception and clerical staff to undertake enhanced roles in active signposting and management of clinical correspondence. For GM, this equates to £2.3m over four years to fund both care | The Rapid Pilot completed September, with celebration event due Oct  
Staffing of Salford Royal team nearing completion.

| Continue to work with Government on a co-investment model for the Care 2020 programme — and begin to implement elements of the programme | Co-investment proposals made to Government - but not taken forward. | Driven progress in relation to 6 key delivery areas: 1. Person centred care & support, 2. Quality, 3. Workforce, 4. High impact models, 5. Technology & innovation, 6. Reforming the wider system. Worked with localities to understand requirements and refine the critical elements of the model for the reform of care at home. Developed a provider co-production plan with aim to test the model out from their perspective. |
Priority 9 – Healthy lives, with quality care available for those that need it

GMS targets

By 2020, improving premature mortality due to cardiovascular disease will result in 160 fewer deaths per annum

- By 2020, improving premature mortality from cancer will result in 350 fewer deaths per annum

- By 2020, improving premature mortality from respiratory disease will result in 150 fewer deaths per annum

Supporting indicators

As of 2014-15, female healthy life expectancy was 60.8, 3.3 years below the national average. Male healthy life expectancy was 59.4, 3.8 years below the national average.

The rate of hospital admissions with alcohol-related conditions was 679 per 100,000 of the population in 2016/17, 8.8% higher than the England average.

76% of adult social care locations in GM were rated as ‘good’ or ‘outstanding’ in September 2018.

63.3% of adults in GM were overweight (BMI >25) in 2016/17.

2015, one year cancer survival rates in GM were 74.2%.

26.3% of GM residents reported high levels of anxiety in 2017/18.

Context and challenges

- Updated data were available for around half of the measures reported above: IAPT access and recovery rates, the proportion of residents who were active or fairly active; smoking prevalence, CQC adult social care ratings; and the proportion of residents reporting high levels of anxiety.

- There will inevitably be a time lag before the impact of GM activity is demonstrated in the premature mortality data, but smoking prevalence is a good indicator of progress against all three targeted measures. The 2017 data show a 0.9 percentage point reduction in the proportion of GM adult residents who were smokers, greater than the 0.7 point reduction for England as a whole (although the gap with the latter remains significant). Positive progress was also evident in the latest reported data on alcohol-related hospital admissions and the proportion of residents who were active or fairly active, both of which should signal shifts in the higher-level outcomes.

- Core activity under the GM Population Health Plan includes Make Smoking History, GM Moving and the GM Cancer Plan, which should accelerate these early signs of improvement.

- Local Care Organisations (LCOs) and Single Commissioning Functions continue to be embedded, focused on integration across locality health and social care systems, although there is some variance in progress. These structural changes will support implementation of transformation activity on the ground, including reform of primary care, urgent and emergency care, mental health, adult social care and dementia provision. A health and social care workforce strategy is also being implemented to ensure that frontline staff are better equipped to deliver new models of care. More broadly, a prospectus for the next phase of health and social care devolution is currently being developed.
Priority 10 (An age-friendly Greater Manchester)

- GM is generally thought to be on track to deliver its Implementation Plan ambitions under this priority, although progress in developing ten locality plans for age-friendly neighbourhoods is behind target and rated amber.
- In terms of the Performance Report measures, GM’s progress is generally slightly behind target (shown as amber), with the exception of the employment rate for 50-64 year-olds, where performance has been stronger than expected.

**Priority 10 – An age-friendly Greater Manchester**

### GMS indicators

**By 2020, 90% of people aged over 50 in GM will identify their neighbourhood as ‘very’ or ‘somewhat’ age-friendly, compared to 80% in 2017**

- **80.6%** of people aged over 50 in eight GM localities identified their neighbourhood as ‘very’ or ‘somewhat’ age-friendly, as reported by the Ambition for Ageing programme in the year to July 2018.
- **67.6%** of 60-64 year old GM residents (335,000) were in employment in the year to June 2019, 5.0% (16,000) ahead of the estimated target trajectory.
- **44.7%** of adult social care service users had as much social contact as they would like in 2017/18.

**In 2015/16, there were 10,428 hospital admissions due to falls amongst GM residents aged over 65. By 2020, we will have reduced this to fewer than 9,700 falls per year.**

- **2,398** hospital admissions for falls per 10,000 GM residents aged >65 in 2016/17 (10,666 in total).
- **4.1%** behind the target trajectory.
- **England** 71.6% (GM 67.6%)
- **Bolton** 65.1% (Bury 71.0%)
- **Manchester** 62.3% (Oldham 61.8%)
- **Rossendale** 63.5% (Salford 73.0%)
- **Stockport** 75.1% (Tamworth 65.4%)
- **Trafford** 71.6% (Wigan 68.5%)
- **GM** 67.6% (England 71.4%)

**By 2020, we will meet or exceed the national average for the proportion of adult social care users who have as much social contact as they would like.**

**Supporting indicators**

- **In 2017/18, there were 766 admissions to residential and nursing care per 100,000 GM residents aged >65, down from 820 in 2016/17, but significantly above the 2017/18 England average (599 per 100,000).**
- **42.6%** of deaths in GM during the year to June 2018 occurred at the person’s usual place of residence, slightly above the figure for the previous year (42.2%), but below the England average for the year to June 2018 (46.7%).

**Context and challenges**

- All of the Priority 10 indicators have been updated in this version of the Performance Report, with the exception of the number of hospital admissions for falls. With regard to the proportion of people identifying their neighbourhood as ‘very’ or ‘somewhat’ age-friendly, performance is slightly down compared to the previously reported period, and lags the target trajectory, but this may reflect Ambition for Ageing’s recent focus in engaging with people who are more excluded and socially isolated. In line with data reported under other GMS priorities, progress on employment is good, with a higher proportion of 50-64 years in work, although still a significant gap with the England average. Similarly, improved performance is evident on the proportion of adult social care users who have as much social contact as they would like, the number of care home admissions and end of life experience, albeit the gap with the national data remains.
- GM is seeking to address the challenges of an ageing population with a positive vision of ageing, set out in the GM Age-Friendly Strategy. Key actions have included the publication of new reports: with TIGM to support age-friendly transport; and with the Centre for Ageing Better (CIAB) and Manchester School of Architecture on housing and ageing.
- We are also working with CIAB to identify a new suite of indicators for the Age-Friendly Strategy, and will reflect this in a refreshed indicator set for future Priority 10 reporting.
- The Mayoral Challenge was launched by GMCA with GMGVO, and will lead to 50 age-friendly communities by 2020.
- The first GM Festival of Ageing was held in July 2018, led by VCSE agencies, and comprised 380 local events plus large events in each locality. 103 small investments were awarded and overall there were 12,639 attendees.
### Enablers and ways of working

- The 2020 actions are largely deemed to be on track and rated either green or amber. Amber actions are generally reflective of the scale of change required to achieve the 2020 target, or where some progress has, to date, been slower than expected. However, two actions are rated red: development of integrated whole system approaches to budget setting and resource management, and agreement of a long-term devolutionary settlement, including policy freedoms and flexibilities, financial settlements, fiscal tools and regulation. Both depend upon the support and active involvement of government. GM continues to actively engage in the Budget and Spending Review processes and positive discussions are ongoing with a number of departments, it is not thought likely that there will be significant progress with devolution or long-term budget setting, given the government’s focus on preparations for leaving the EU.

<tr>
<td>11.1 Put in place new ways of working with the VCSE sector, including new approaches to funding, building on the accord</td>
<td>GM’s collective ability to truly embed and deliver on different ways of working with the VCSE sector, will require a significant cultural shift at GM and locality level.</td>
<td>Tested an outcomes based commissioning approach with the VCSE, using School Readiness as an exemplar</td>
<td>Set of principles for commissioning SR activity with VCSE developed and agreed. Opportunities for testing now being explored.</td>
<td>Through the SR programme, work with localities to embed commissioning principles at local levels.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Defined and tested with partners a draft set of co-production and co-design principles</td>
<td>A set of co-production principles has emerged through the first phase of the ‘Elephants’ project (a project which brought together policy makers from the GMCA and people with lived experience). Learning from phase 1 of the Elephants projects has led to a new approach to co-production being tested with the commissioning and monitoring of the GM Prison Family support contract and the development of the Housing First project.</td>
<td>Scope for the second phase of ‘Elephants’ project agreed, aligned to the Leaders in GM programme.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Developed a framework for investing more effectively in VCSE organisations</td>
<td>The Deputy Mayor has awarded £1.1m to local authorities to support community safety initiatives, empower young people and build stronger communities. Each local authority will receive £100,000 - with an additional £100,000 awarded to MCC - to distribute to local projects and work with communities and voluntary groups to keep people safe, reduce harm and offending, and strengthens communities. The community grant funding is being provided directly to each local authority to allocate across their boroughs and will form a one year pilot into long term core funding.</td>
<td>Develop Implementation Plan for VCSE Accord</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Supported the delivery of GDPR training for VCSE sector</td>
<td>Completed - 128 voluntary sector organisations from across Greater Manchester benefitted from the training with 181 individual delegates participating.</td>
<td>VCSE Funding Pilot ongoing until Mar 19 and be evaluated by end of 2019.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Explored wider uses of data and intelligence generated by the VCSE sector</td>
<td></td>
<td>VCS engaged to co-design and shape the GM Information Governance Framework.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Undertake scoping work for possible better uses of existing academic and VCSE generated data</td>
</tr>
</tbody>

### 11.2 Develop a GM approach to public service workforce development and the redesign of future roles, promoting the use of asset based approaches within all frontline practice

- Planned delivery activity against this action is currently on track, however to achieve this ambition will require significant culture change across the GM system.
- Developed a GM workforce framework, which supports the redesign of frontline roles at GM and locality level.
- A three tier framework has been developed which consolidates learning from GM reform activity. The framework sets out the core activities and expectations of the public service workforce. This framework has been tested with reform, HR and OD leads across the system.

### 11.3 Adopt new ways of using data and intelligence, to ensure it drives system reform and performance management, based on what matters to people

- Activity is on track to achieve 2020 action.
- Developed and tested a risk stratification model to support activity across the priorities within the GMS.
- Completed citizen engagement work to better understand resident attitudes to how public services access and use information.
- Research is now complete – it gain insight from 1,000 GM residents and focussed on trust, information security, sharing information with the private sector, transparency and consent. Cross sector review with stakeholders completed.
- Have defined and rolled out a strategic information governance approach which enables public service reform by fast tracking new arrangements across GM.
- Head of Information Governance and Data Protection Officer has now been appointed and the GMCA’s IG service is being formed.
- Draft IG implementation plan developed for GM which includes strategic outward facing work streams.
- Have increased the use of the Information Sharing Gateway.
- Draft implementation plan developed for GM. Represent GM at national level IG steering groups to ensure strategic work at national level is accounting for the use ISG.

### Remarks

- Have set vision for the GM public service workforce, and developed a shared plan for achieving this which is directly informed by the workforce reform required.
- Have defined and rolled out a strategic information governance approach which enables public service reform by fast tracking new arrangements across GM.
- Have increased the use of the Information Sharing Gateway.
- Draft IG implementation plan developed for GM.
- Represent GM at national level IG steering groups to ensure strategic work at national level is accounting for the use ISG.

<thead>
<tr>
<th>11.4 Implement place-based integration models in every locality in GM, including VCS organisations and SMEs; aligned to the development of Local Care Organisations serving 30-50K neighbourhood populations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned delivery is currently on track, however in terms of operating models and standards being implemented effectively in all localities will require a significant commitment to implementation at a local level</td>
</tr>
<tr>
<td>Developed GM standards for integrated delivery in place</td>
</tr>
<tr>
<td>All ten localities have undertaken a Strategic Self-Assessment for Reform as a partnership. The findings from this have been brought together with the findings from ten LCD development conversations to inform a set of system standards for integrated delivery in place. These standards were endorsed by the Reform Board in September 2018. The GM PSR Team has continued to provide support to Localities in the implementation of their place-based responses.</td>
</tr>
<tr>
<td>• 10 locality plans in place, setting out how they will implement the system standards, supported by investment from transformation funds including the Reform Investment Fund &amp; Health &amp; Social Care Transformation Fund.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>11.5 Put in place Public Service Hub functions in every district, based on GM standards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned work is on track, the reality of bringing together the ‘as is’ and ‘to be’ delivery models, whilst ensuring safeguarding issues and relevant assurance are in place is complex and requires care and caution in developing and implementation.</td>
</tr>
<tr>
<td>Agreed GM standards for the implementation of Public Service Hubs</td>
</tr>
<tr>
<td>Core standards for the components and capabilities of a Public Service Hub function have been co-designed with partners. The public service hub function forms part of the service standards endorsed at the Reform Board in September 2018.</td>
</tr>
<tr>
<td>• 10 locality plans in place, setting out how they will implement the GM standards, including a public service hub function. Work will have been done locally to understand the connectivity with integrated neighbourhood delivery functions.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>11.6 Develop integrated whole system approaches to budget setting and resource management that consider the impact of decisions at place level.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delivery milestones are felt to be on track, however progress against the 2020 action is dependent upon clear asks of Gov to be agreed.</td>
</tr>
<tr>
<td>Worked with at least one locality area to understand and develop an approach to implementation</td>
</tr>
<tr>
<td>A proposed methodology has been developed for the implementation of a shadow place-based budget and options are being discussed with localities.</td>
</tr>
<tr>
<td>• Tested agreed approach with more localities and identified options for scaling across GM.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>11.7 Design and adopt a place leadership approach universally across GM, including single locality leadership arrangements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Activity is on track to achieve 2020 action</td>
</tr>
<tr>
<td>Implemented through a place-based approach, a third cohort of GM Leaders on Leading GM programme</td>
</tr>
<tr>
<td>Phase 3 of the Leaders in GM programme was launched in May 2018. Each of the ten localities has identified a place-based challenge which is a priority for their locality partnership. These challenges will act as a vehicle for learning around place-based leadership. Up to 20 local leaders have been nominated to each challenge from across the system, and all levels.</td>
</tr>
</tbody>
</table>
| • Developed an approach to the sustainability and scalability of a place-based leadership approach across GM.  
• An evaluation of Leaders in GM, and high level design of phase 4 will be completed.  
• Designed digital content for inclusion in Leading GM. |

<table>
<thead>
<tr>
<th>11.8 Release public sector owned land and property for regeneration, housing and growth via the One Public Estate Programme</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delivery of this action requires complex partnership working across a range of projects including integration, PSR, regeneration and release of assets</td>
</tr>
<tr>
<td>Progressed individual milestones as per project plans in GM OPE Partnership Services and Asset Delivery Plan</td>
</tr>
<tr>
<td>Projects include integrated service hubs, locality asset reviews and town centre regeneration schemes. Generally, projects are experiencing both positive and negative shifts in timescales and benefits as the projects evolve and are estimated to release 68Ha of land to deliver 4,600 houses. Approximately 3Ha of land has been released to date.</td>
</tr>
<tr>
<td>• Continued expansion of the GM OPE Programme including OPE Phase 7 submission in November 2018</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>11.9 Deliver Neighbourhood Asset Review Programme, providing integrated place-based approaches to review of assets, services and needs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Activity is on track to achieve 2020 action</td>
</tr>
<tr>
<td>Stage 3 of NARs completed on: Bolton; Oldham; Rochdale; Tameside; Salford; Wigan; Stockport (Stepping Hill locality); Trafford</td>
</tr>
<tr>
<td>Withington and Burnage NAR reviewed to include wider South Manchester locality and Partners preparing implementation plan. Bury and Stockport reviewed NAR actions and implementing solutions.</td>
</tr>
</tbody>
</table>
| • Completed all programmed NAR and GM Wide NAR.  
• Defined Project implementation plans and outcomes for completed NAR. |
