1. AUDIT PROGRESS

Purpose of this report

This report provides the Audit Committee with an update on progress in delivering our responsibilities as your external auditors.

Audit progress

Our key audit stages are summarised in the diagram shown below and our Audit Strategy Memorandum is being presented to the Audit Committee for discussion at this meeting.

Since reporting our progress to the January Audit Committee we have completed our interim audit visit. This included early substantive testing in the following areas:

- Months 1 – 10 grant expenditure
- Months 1 – 10 operating expenditure
- Months 1 – 10 grant income
- Months 1 – 10 fees and charges income
- Months 1 – 10 capital expenditure
- Existence and ownership testing of the Authority’s property, plant and equipment balances
- Analytical review of year-to-date payroll expenditure.

There are no issues to bring to your attention at this stage of the audit.

Financial Reporting Workshops

In January we held our Local Government Financial Reporting workshops for officers involved in the production of the financial statements and officers from GMCA responsible for preparing the Authority’s financial statements attended. These workshops provided an update on the latest developments as well as a forum for our clients to discuss emerging issues. It included a revisit of 2017-18 final accounts issues, early close implications, changes in the 2018-19 Code and a forward look to future regulatory and policy changes.

1. Local auditor reporting in England 2018, NAO, January 2019

Since 2015, the Comptroller and Auditor General (C&AG) has been responsible for setting the standards for local public audit, through maintaining a Code of Audit Practice and issuing associated guidance to local auditors.

The report describes the roles and responsibilities of local auditors and relevant national bodies in relation to the local audit framework and summarises the main findings reported by local auditors in 2017-18. It also considers how the quantity and nature of the issues reported have changed since the C&AG took up his new responsibilities in 2015, and highlights differences between the local government and NHS sectors. The report highlights a number of points as summarised below.

- Auditors gave unqualified opinions on financial statements in 2015-16, 2016-17 and 2017-18. This provides assurance that local public bodies are complying with financial reporting requirements. As at 17 December 2018, auditors had yet to issue 16 opinions on financial statements, so this does not yet represent the full picture for 2017-18.

- Auditors qualified their conclusions on arrangements to secure value for money at an increasing number of local public bodies: up from 170 (18%) in 2015-16 to 208 (22%) in 2017-18. Again, as at 17 December 2018, auditors had yet to issue 20 conclusions on arrangements to secure value for money, so this number may increase further for 2017-18. This level of qualifications reinforces the need to ensure that local auditors’ reporting informs as much as possible relevant departments’ understanding of the issues facing local public bodies.

- Auditors qualified their conclusions at 40 (8%) of local government bodies. The proportion of qualifications was highest for single-tier local authorities and county councils where auditors qualified 27 (18%) of their value for money arrangements conclusions. The qualifications were for weaknesses in governance arrangements, often also highlighted by inspectorates’ ratings of services as inadequate.

- More local NHS bodies received qualified conclusions on arrangements to secure VfM than local government bodies. In 2017-18, auditors qualified 168 (38%) of local NHS bodies’ conclusions; up from 130 (29%) in 2015-16, mainly because of not meeting financial targets such as keeping spending within annual limits set by Parliament; not delivering savings to balance the body’s budget; or because of inadequate plans to achieve financial balance. The increase between 2015-16 and 2017-18 is particularly steep at clinical commissioning groups, with qualifications for poor financial performance increasing from 21 (10%) in 2015-16 to 67 (32%) in 2017-18.

- Local auditors are using their additional reporting powers, but infrequently. Since April 2015, local auditors have issued only three Public Interest Reports, and made only seven Statutory Recommendations. These Public Interest Reports have drawn attention to issues such as unlawful use of parking income, governance failings in the oversight of a council-owned company, management of major projects or members’ conduct. Auditors have made Statutory Recommendations in relation to failing to deliver planned cost savings, poor processes for producing the annual financial statements and failure to address weaknesses highlighted by independent reviews.

- A significant proportion of local bodies may not fully understand the main purpose of the auditor’s conclusion on arrangements to secure value for money and the importance of addressing those issues. 102 local public bodies were contacted where auditors had reported concerns about their arrangements to ensure value for money:
  - half of the bodies (51) said that the auditor’s report identified issues that they already knew about;
  - fifty-seven (95%) of those responding said they had plans in place to address their weaknesses but only three were able to say that they had fully implemented their plans; and
  - twenty-six (25%) did not respond at all to the NAO’s request.

- The extent to which central government departments responsible for the oversight of local bodies have formal arrangements in place to draw on the findings from local auditor reports varies. Processes in the relevant central government departments differ. The Department of Health & Social Care, NHS Improvement and NHS England have arrangements in place to monitor the in-year financial performance of local NHS bodies, and use information from local auditor reports to confirm their understanding of risks in the system. The Home Office and Ministry of Housing, Communities & Local Government consider the output from local auditors’ reports to obtain a broad overview of the issues local auditors are raising, but there is a risk that these two departments may be unaware of all relevant local issues.
2. NATIONAL PUBLICATIONS

1. Local auditor reporting in England 2018, NAO, January 2019 (continued)

- Under the current local audit and performance framework, there is no direct consequence of receiving a non-standard report from the local auditor. Before 2010, a qualified value for money arrangements conclusion would have a direct impact on the scored assessments for all local public bodies published by the Audit Commission at that time. While departments may intervene in connection with the issues giving rise to a qualification, such as failure to meet expenditure limits, there are no formal processes in place, other than the local audit framework, that report publicly whether local bodies are addressing the weaknesses that local auditors are reporting.

A list of all local bodies that received a non-standard local auditor report for 2017-18 was published alongside the report.

2. Local authorities - governance, NAO, January 2019

The NAO has recently published a report on local authority governance, which examines whether local governance arrangements provide local taxpayers and Parliament with assurance that local authority spending achieves value for money and that authorities are financially sustainable.

The report finds that local authorities have faced significant challenges since 2010. For example, they have seen a real-terms reduction in spending power of 29% and a 15% increase in the number of children in care. These pressures raise the risk of authorities’ failing to remain financially sustainable and deliver services.

The way authorities have responded to these challenges have tested local governance arrangements. Many authorities have pursued large-scale transformations or commercial investments that carry a risk of failure or under-performance and add greater complexity to governance arrangements. Spending by authorities on resources to support governance also fell by 34% in real terms between 2010-11 and 2017-18, potentially increasing the risks faced by local bodies.

In 2017-18, auditors issued qualified VFM arrangements conclusions for around one in five single tier and county councils. A survey, carried out by the NAO, of external auditors indicates that several authorities did not take appropriate steps to address these issues.

Some external auditors have raised concerns about the effectiveness of the internal checks and balances at the local authorities they audit, such as risk management, internal audit and scrutiny and overview. For example, 27% of auditors surveyed by the NAO do not agree that their authority’s audit committees provided sufficient assurance about the authorities’ governance arrangements. Auditors felt that many authorities are struggling in more than one aspect of governance, demonstrating the stress on governance at a local level.

Some authorities have begun to question the contribution of external audit to providing assurance on their governance arrangements. 51% of chief finance officers from single tier and county councils responding to our survey indicated that there are aspects of external audit they would like to change. This includes a greater focus on the value for money element of the audit (26%). External auditors recognise this demand within certain local authorities. However, their work must conform to the auditing standards they are assessed against and any additional activity may have implications for the fee needed for the audit.

The report also finds that MHCLG does not systematically collect data on governance, meaning it can’t rigorously assess whether issues are isolated incidents or symptomatic of failings in aspects of the system. MHCLG recognises that it needs to be more active in leading co-ordinated change across the local governance system. The report recommends that MHCLG works with local authorities and other stakeholders to assess the implications of, and possible responses to, the various governance issues identified. It should examine ways of introducing greater transparency and openness to its formal and informal interventions in local authorities and should adopt a stronger leadership role in overseeing the network of organisations managing key aspects of the governance framework.

3. NHS financial sustainability, NAO, January 2019

This is the NAO’s seventh report on the financial sustainability of the NHS. In its recent reports, in December 2015, November 2016 and January 2018, the NAO concluded that financial problems in the NHS were endemic and that extra in-year cash injections to trusts had been spent on coping with current pressures rather than the transformation required to put the health system on a sustainable footing. To address this, local partnerships of clinical commissioning groups (CCGs), NHS trusts and NHS foundation trusts (trusts) and local authorities were set up to develop long-term strategic plans and transform the way services are provided more quickly.

In June 2018, the Prime Minister announced a long-term funding settlement for the NHS, which will see NHS England’s budget rise by an extra £20.5 billion by 2023-24. Between 2019-20 and 2023-24, this equates to an average annual real-terms increase of 3.4%. The government asked NHS England to produce a 10-year plan that aims to ensure that this additional funding is well spent. In return for this extra funding, the government has set the NHS five financial tests to show how the NHS will do its part to put the service onto a more sustainable footing.

This report covers 2017-18, so the NAO first concludes on financial sustainability for that year. The NAO considers that the growth in waiting lists and slippage in waiting times, and the existence of substantial deficits in some parts of the system, offset by surpluses elsewhere do not add up to a picture that can be described as sustainable. Recently, the long-term plan for the NHS has been published, and government has committed to longer-term stable growth in funding for NHS England.

In the NAO’s view these developments are positive, and the planning approach seen so far looks prudent. The NAO further states that it will really be able to judge whether the funding package will be enough to achieve the NHS’ ambitions when we know the level of settlement for other key areas of health spending that emerges from the Spending Review later in the year. This will help inform whether there is enough to deal with the embedded problems from the last few years and move the health system forward.

4. Planning for New Homes, NAO, February 2019

The NAO has recently published a report on Planning for new homes. This report is part of a series on housing in England, including Housing in England: overview (2017) and Homelessness (2017). The latest report focuses on the Ministry of Housing, Communities and Local Government’s (MHCLG’s) objective for housing in England to deliver a million homes by the end of 2020; half a million by the end of 2022; and to deliver 300,000 net additional homes a year on average. The report recognises that increasing the supply of new homes is a complex task and one of the measures MHCLG has introduced to help achieve the objective is reforming the planning system. The report notes that the planning system is fundamental to providing new homes and it assesses how effectively MHCLG supports the planning regime to provide the right homes in the right places through:

- supporting local authorities to produce plans for how the supply of new homes will meet need in their area;
- supporting local authorities and the Planning Inspectorate in having effective and sufficiently resourced planning processes and teams to deal with planning applications and appeals; and
- working effectively with local authorities, other government departments and developers to ensure infrastructure to support new homes is planned and funded.

The report finds that at present, the system is not providing value for money and that the supply of new homes has failed to meet demand. It notes that a number of factors have contributed to the planning system not working and some of these include:

- the process of setting the need for new homes;
- the reductions in local authority capability;
- the under-performing Planning Inspectorate; and
- failures in the system to ensure adequate contributions for infrastructure.

The report recognises that MHCLG’s new National Planning Policy Framework is an important step, but it is too early to tell whether the changes it introduces will be effective. The report also makes a number of recommendations for MHCLG to implement alongside the framework to help the planning systems work more effectively.

Local Audit Quality Forum, Public Sector Audit Appointments, December 2018

The Local Audit Quality Forum (LAQF) is a forum within which representatives of relevant audit bodies can work together and collaborate with others to share good practice and strive to enable improvements in the quality, efficiency and effectiveness of audit arrangements and practices in principal local authorities and police bodies in England. PSAA wants to develop a momentum and a passion for continuous improvement in audit arrangements throughout the entities and sectors for which PSAA has a mandate.

Slides of the Manchester December 2018 event are available on the PSAA website as per the link below.

The theme of the Manchester event was financial resilience and sustainability, a major challenge for all local authorities and police bodies in the current climate and a key strategic concern as bodies prepare 2019/20 budgets and update medium term plans. The event explored:

- the nature and scale of the sustainability challenges facing local bodies;
- the strategies and disciplines which can help to address them successfully; and
- the roles and responsibilities of Chief Finance Officers and Auditors in helping to maintain resilience and sustainability.

CIPFA Fraud and Corruption Tracker 2017-18, CIPFA, October 2018

The CIPFA Fraud and Corruption Tracker (CFaCT) survey gives a national picture of fraud, bribery and corruption across UK local authorities and the actions being taken to prevent it. It aims to:

- help organisations understand where fraud losses could be occurring;
- provide a guide to the value of detected and prevented fraud loss;
- help senior leaders understand the value of anti-fraud activity; and
- assist operational staff to develop pro-active anti-fraud plans.

The 2017-18 report shows that fraud continues to pose a major financial threat to local authorities, with £302m detected or prevented by councils in 2017-18. While this was £34m less than last year’s total, the report revealed an overall increase in the number of frauds detected or prevented – up to 80,000, from the 75,000 cases found in 2016-17. Among these cases there are reminders of some of the challenges being faced by local authorities, with the number of serious or organised crime cases doubling to 56, and a significant increase in the amount lost to business rates fraud, which jumped to £10.4m in 2017/18 from £4.3m in 2016-17.

2. NATIONAL PUBLICATIONS

8. Scrutinising Public Accounts: A Guide To Government Finances, CIPFA, November 2018

This guide provides an overview of the different processes for budgeting and performance reporting in central and local government, health bodies and includes key questions to ask when scrutinising government financial statements using examples based on UK public sector accounts.

This publication is available only.

9. An introductory guide to Local Government Finance, CIPFA, February 2019

This introductory guide addresses the basic questions regarding how money flows, how budgets are set and where it is spent in local government. An understanding of these issues is essential to realising the current issues in local government.

This guide is aimed at helping local councillors, those working with and for local councils, and anybody with an interest in the sector to understand the complexity of local government finance.

The guide covers revenue and capital financing, financial reporting, governance and auditing as well as giving an overview of some of the key services provided by local councils.

This guide is available online only.

10. Summary of NHS long-term plan, Mazars, January 2019

The NHS Long Term Plan was published on 7 January 2019. It sets out the priorities for the new funding settlement announced in June 2018 – a real terms increase of £20.5bn by 2023-24 representing an average increase of revenue funding of 3.4% per annum, compared to an average of 2.2% in recent years.

Views on the deliverability of the plan will vary, particularly as some aspects of implementation will depend on spending review decisions later this year and the direction of travel for social care. The plan recognises existing financial pressures and workforce challenges and takes some steps to manage these risks whilst accepting that further nationally-led work is necessary to alleviate these constraints.

https://www.mazars.co.uk/Home/Industries/Public-Services/Health/NHS-Long-Term-Plan-summary

This toolkit has been developed to help councils create the underlying policies, procedures, ethos and environment that encourages and empowers women, parents and carers to become local councillors and take on leadership positions.

The Local Government Association is encouraging councils to consider their existing practices, celebrate what is working, share good practice and take action to support councillors who are women, parents and carers.

The equal participation of women and men in local politics, as our elected councillors and as our leaders, is an important condition for effective democracy and good governance. Representative councils are best able to speak to, and for, their communities and to support the effective business of local government. Democracy and decision-making are strengthened when councillors reflect the people they seek to serve and represent.
