2. That authority be delegated to the GMCA Treasurer, in consultation with the Portfolio Lead and Lead Chief Executive for Green City Region, for individual expenditure decisions within this £1m, including approval of any consequent grants to districts from this money where appropriate.

3. That the findings of the Intergovernmental Panel on Climate Change (IPCC) report ‘Global warming of 1.5°’ published on 8 October 2018, be noted in particular:

   • That human activities were estimated to have already caused approximately 1.0°C of global warming above pre-industrial levels

   • That if we continue at the current rate, we are likely to surpass the Paris Agreement target of 1.5°C as early as 2030

   • That at the current level of commitments, the world was on course for 3°C of warming with irreversible and catastrophic consequences for humans and the natural world

4. That the GMCA believed that:

   • The impacts of global temperature rise above 1.5°C, were so severe that Governments at all levels must work together and make this their top priority
• As well as large-scale improvements in health and wellbeing around the world, bold climate action could deliver economic benefits in terms of new jobs, economic savings and market opportunities

• As urban populations increased, greater consideration of how urban systems could develop sustainability would be required

5. That the GMCA declare a ‘climate emergency’ to support the delivery of the GM 5 Year Environment Plan.

6. That it be agreed to establish a Green City Region Board and Partnership Group, building on the existing Low Carbon Hub Board, with a remit to:

• Monitor progress against the carbon budgets set out in the 5 Year Environment Plan and to achieve a challenging target date of 2038 for carbon neutrality or earlier if possible

• Take a mission based approach to achieving this target date as part of our Local Industrial Strategy agreed with Government, and to ensure we maximise the economic opportunities presented by the move to carbon neutrality

• Consider systematically the climate change impact of each area of the GMCA’s activities

• Make recommendations and set an ambitious timescale for reducing these impacts in line with the tasks set out in the 5 Year Environment Plan

• Assess the feasibility of requiring all report risk and procurement assessments to include Carbon Emission Appraisals, including presenting alternative approaches which reduce emissions wherever possible

• Report to GMCA every six months on progress and actions required to take to address this emergency and how it will work with GM Districts to develop a Mission Based Approach to implementation

7. That it be agreed to task a director level officer with responsibility for reducing as rapidly as possible, the carbon emissions resulting from the GMCA’s activities.

8. That it be agreed to equip staff, particularly those involved with buildings, energy and transport management and procurement of goods and service, with an awareness of the CO2 costs and impacts of everyday activities, and the ability and motivation to reduce emissions.

9. That it be agreed that reducing emissions from aviation was an important international issue which has been accounted for prior to setting GM’s carbon reduction targets.
Since 2015, Manchester Airport’s direct emissions, including those from the airports terminals, infrastructure and owned vehicles, have been carbon neutral. There was a long-term plan to reduce emissions from UK aviation – the Sustainable Aviation Carbon Roadmap. In the future, the aviation industry would be a significant buyer of ‘market-based measures’ for carbon capture and storage. GM will work with Manchester Airport and others to explore the opportunity to provide local carbon sequestration credits, building upon our aspiration of a green economy with enriched habitats.

10. That tackling climate change was everybody’s responsibility.

11. That it be noted that the work of the GM Pension Fund (GMPF) in addressing Climate Change, more specifically to become 100% net carbon neutral by 2050 at the latest, was aligned with the additional recommendations tabled at the meeting.

12. That it be noted that the GMPF does not hold any direct holdings in fracking.

13. That the GMCA agree that the recent activity of Fossil Free GM in attacking Guardsman Tony Downes House, GMPF offices, was disappointing and unacceptable, notwithstanding the cost to the public in responding to the incident.

14. That the GMCA record its thanks to Councillor Brenda Warrington for her work as Chair of GMPF in supporting the work to address climate change.

15. That it be agreed that the Mayor would write to the Prime Minister to inform them that GMCA has declared a climate emergency, with a request from Government to provide the resources and powers necessary to deal with it.

16. That the GMCA record its thanks to Councillor Andrew Western for his work on the Green City Region Agenda, and the implementation of the 5 Year Environment Plan which would be a significant contributor towards the achievement of the Government’s low carbon targets.
